

SAN LUIS OBISPO COUNTY

COMMUNITY LIBRARIES

Information below as to the establishment of community branches in the County Library system is taken from the *Library News Notes*. The Main Office (SLO) was established on July 1, 1919. Some confusion may arise as many of the schools (with the same name) in the same vicinity were serviced by the county system and were established on different dates than those of a community branch. Virtually all community branches were housed in a business, the post office and/or the home of the custodian.
